— May 23, 2013 — Remote Technologies Incorporated (RTI) today announced a major update to its programming software Integration Designer®, a CEDIA Hall Of Fame inductee.. Integration Designer 9 0 introduces a new way for integrators to design large systems using multiple processors, known as the 'master/slave mode.. The processors communicate via Ethernet, enabling the resources of the slave processors to be available for control of devices — even two-way drivers can be assigned to run on a slave processor.
